Candy Thomas

How Management Techniques Impact Soil Biology

Candy has been with the NRCS since 1994 and is now a Regional Soil Health Specialist for Kansas and Nebraska. She provides agronomic advice on soil indicators, cover crops, water quality resource issues, erosion control and training in conservation planning and management systems.

Lance Gunderson

How Soil Biology Affects Crop Health

Lance is a founding member and the President of Regen Ag Lab. As a well-known promoter of soil health testing, Lance carries his passion for soil health testing into Regen Ag Lab. Lance is excited to continue to establish and promote newly developed agronomic tests designed to aid producers managing their operations under the regenerative ag model.
